THE

PRISM

PUBLISHED BY THE  
JUNIOR CLASS

MAINE STATE COLLEGE

*Chas. P. Weston*

TO  
THE FRIENDS OF THE MAINE STATE COLLEGE  
IN THE  
**Sixty-seventh Legislature of the State of Maine,**  
WHO RECOGNIZED THE NEEDS OF OUR INSTITUTION  
AND AIDED US  
BY THEIR ELOQUENCE AND STATESMANSHIP,  
**The Class of Ninety-Six**  
RESPECTFULLY DEDICATES THIS VOLUME.

- VIII. Electrical Engineering.

WITH this edition of THE PRISM, the second volume of this publication is placed before its readers, with the fervent hope that it may meet with the success that awaited the first volume. The spectrum of college life at Maine State as refracted by the rays of the '95 PRISM, has been examined most thoroughly by the keen eye of the student, by the spectro-scope of the faculty, and by the alumni, whose mature years, together with their interest in the best welfare of the College, necessarily gives to them the right to criticise. All have viewed it, each from his own standpoint, and nothing but commendation for the zeal displayed by the editors from this class, has been manifested.

We have been materially assisted in our work by the '95 editors, whose experience and advice have aided us over many difficulties which habitually beset such ventures, and we ask those who peruse this volume to give our predecessors credit for any ideas which they may have originated last year.

College annuals portray the life at the institution which they represent to a degree which cannot be too highly estimated. They fall into the hands of students of other colleges more frequently than do the catalogues, and in many cases this is their only means of knowing any facts concerning the institution from

which these annuals come. Therefore, living as we do in this *fin de siecle* era, we have endeavored to maintain the high standard of THE PRISM in the hope that Maine State's publications may ever be abreast of the times.

With the largest Freshman class that ever entered the College, with a prospect of a still larger class next fall, and with an augmented income with which to increase the facilities of instruction, the College has never had a brighter outlook, and one should be pardoned for any optimistic views which he may hold in regard to the future of the Maine State College.

ABRAM WINEGARDNER HARRIS, Sc. D.

*President.*

Born at Philadelphia, Penn., 1858. Fitted for college at Friends' Central School of Philadelphia. Entered the Wesleyan University at Middletown, Conn., in 1876, and was graduated in 1880 with degree of B. A. Taught Mathematics in Williamsport Dickinson Seminary, Penn., 1880-1, and in Wesleyan University, 1881-4. Studied in Universities of Berlin and Munich, 1884-5. Taught Political Economy and History in Wesleyan University, 1885-8. Assistant Director office of Experiment Stations in U. S. Department of Agriculture, 1888-1891. Director of same, 1891-3. President of Maine State College since September, 1893. *A. A. Φ.*

GEORGE H. HAMLIN, C. E.

*Professor of Civil Engineering.*

Born in Sidney, Me., 1850. Fitted at Waterville Classical Institute. Entered the Maine State College in the Sophomore class, February, 1871. Took the course in Civil Engineering and graduated in 1873. Was elected Instructor in Civil Engineering upon graduation and has been connected with the College in some capacity ever since. Was made Professor of Mathematics in 1878. Was made Professor of Civil Engineering in 1880, and made Treasurer of the College and Experiment Station in 1889.

ALFRED B. AUBERT, M. S.

*Professor of Chemistry.*

Born in New York City, April 29, 1853. Studied in private schools. Studied at the Imperial Lyceum of Strasburg, France. Took full course in Chemistry at Cornell University. B. S., 1873. Connected with M. S. C. since February, 1874. M. S., Maine State College, 1874.

ALLEN E. ROGERS, A. M.

*Professor of History, Logic and Political Economy.*

Born in Ellsworth, Me., April 23, 1855. A. B., Bowdoin, 1876. A. M., Bowdoin, 1880. Principal Hampden Academy, 1876-77. Attended Medical School of Maine, 1878. Professor, 1882 to date. Admitted to Penobscot Bar, 1891. Trustee Hampden Academy. Member American Economic Association. *Θ. Δ. X.*

WALTER FLINT, M. E.

*Professor of Mechanical Engineering.*

Born April 13, 1860, Baldwin, Cumberland County, Me. Fitted for college in public schools of Baldwin. Entered Maine State College, 1878. Appointed Instructor in Shop Work, fall of 1881. B. M. E., 1882. M. E., 1885. Professor of Mechanical Engineering, 1886. Q. T. V.

WHITMAN H. JORDAN, M. S.

*Director of Experiment Station and Professor of Agriculture.*

Born in Raymond, Me., Oct. 27, 1851. B. S., Maine State College, 1875. Principal Dennysville High School, 1876-77. Post-graduate course in Chemistry and Physics at Cornell University, 1877-78. Assistant in Experimental and Analytical Chemistry at Wesleyan University, Middletown, Conn., 1878-79. Instructor at Maine State College, 1879-80. Professor of Agriculture and Agricultural Chemistry at the Pennsylvania State College, 1881-85. Chemist to Pennsylvania State Board of Agriculture, 1883-85. Director Maine Agricultural Experiment Station since 1885. Professor of Agriculture since 1894.

JAMES M. BARTLETT, M. S.

*Chemist of the Experiment Station.*

Born in Litchfield, Me., Sept. 25, 1854. Graduated at Maine State College, 1880. Chemist to Fertilizer Control Station at Pennsylvania State College, 1882-84. Chemist to the Maine Experiment Station, 1885 to date. Degree M. S. from Maine State College, 1883.

FRANCIS LEROY HARVEY, M. S., PH. D.

*Professor of Natural History.*

Born April 22, 1850, near Ithaca, N. Y. Early education in city schools of Ithaca. Entered the Iowa Agricultural College in 1868. Student Assistant in Chemistry for two and a half years. Curator in Entomology for Natural History Society of *Alma Mater* for three years, and President for two years. Graduated in 1872, degree B. Sc. Chair of Natural Sciences, Humboldt College, Iowa, 1874. Post-graduate course in Botany at *Alma Mater*, 1874. Harvard Summer Course in Mineralogy and Geology, 1877. From 1875-81, Chair of Theoretical and Applied Chemistry in the Arkansas Industrial University. From 1881-85, Chair of Biology, Mineralogy and Geology in the same institution. In charge of Dr. A. E. Foote's Natural History and Mineral establishment in Philadelphia, Pa., 1885-6. From 1886 to date, Chair of Natural History, Maine State College. From 1888 to date, also Botanist and Entomologist to the Maine State College Experiment Station. M. Sc. degree, 1886, from *Alma Mater*. Thesis, "The Forest Trees of Arkansas." Ph. D., 1890, Arkansas Industrial University. Thesis, "The Apple Maggot—*Trypeta pomonella*, Walsh." Author of over fifty articles on various scientific subjects. Has discovered about fifty species new to science, including fossil plants and insects, modern flowering plants, cryptogams and insects. Has had several species named after him in recognition of scientific work.

LUCIUS H. MERRILL, B. S.

*Chemist of the Experiment Station.*

Born Auburn, Me., Oct. 1, 1857. B. S., Maine State College, 1883. Department of Lithology and Physical Geology, United States National Museum, Washington, D. C., 1885-86. Chemist Maine State Experiment Station since 1886.

JAMES NORRIS HART, C. E.

*Professor of Mathematics and Astronomy.*

Born at Willimantic, Me. Studied at Monson Academy and Foxcroft Academy. Entered Maine State College in 1882. B. C. E., Maine State College, 1885. C. E., 1890. Took post-graduate work at Williams College and Clark University. Instructor in Mathematics and Drawing, Maine State, 1887-90. Professor of Mathematics and Astronomy since 1891. Member of New York Mathematical Society and of Astronomical Society of the Pacific. Post-graduate course at Chicago University, 1894-95. Q. T. V.

HOWARD S. WEBB, B. M. E.

*Instructor, Foreman of Shops, Secretary and Registrar.*

Born at Hartland, Me., Oct. 10, 1865. Graduated from Skowhegan High School, class of '83. Entered Maine State College in Sophomore class in fall of '84. Commenced to teach at M. S. C. in spring of '87. B. M. E., June, '87. Took course in Mechanical work at Cornell University, 1890-91. Q. T. V.

FREMONT L. RUSSELL, B. S. V. S.

*Instructor in Veterinary Science, Veterinarian to Experiment Station.*

Born Paris, Me., June 13, 1862. Fitted for college at Maine Wesleyan Seminary. Entered Sophomore class, 1882. B. S., 1885. New York College Surgery, 1886. Bacteriological Department of Johns Hopkins University, 1888-89. Came to Maine State College, 1889. United States Government Veterinary Inspector, 1891-94. Member Maine State Veterinary Medical Society, United States Veterinary Medical Society. Q. T. V.

NATHAN C. GROVER, C. E.

*Assistant Professor of Civil Engineering.*

Born in Bethel, Me., Jan. 31, 1868. Graduated from Gould's Academy, Bethel, in 1887. Entered Maine State College in fall of '87. B. C. E., 1890. Took post-graduate work at the Massachusetts Institute of Technology. Assistant Engineer Upper Coos Extension of M. C. R. R., 1890. Assistant Engineer Oxford Mountain R. R. in 1891. Assistant Professor, 1894. B. O. II.

WELTON MARKS MUNSON, M. S.

*Professor of Horticulture and Horticulturist of the Experiment Station.*

Born at Howell, Mich. Entered Michigan Agricultural College in 1885. B. S. in '88. Assistant in Horticulture, Cornell University, 1888-91. Took special work at Cornell and at Michigan Agricultural College, 1890-92. M. S., (Mich.) 1892. Came to Maine State College as Professor of Horticulture, 1891. Member American Association for Advancement of Science, American Pomological Society, etc. *Φ. Δ. Θ.*

HORACE M. ESTABROOKE, M. S., M. A.

*Professor of Rhetoric and Modern Languages.*

Born at Linneus, Me. Attended Houlton Academy. Entered Maine State College in 1872. B. S., Maine State College, 1876. M. S., Maine State College, 1884. Matriculated at Illinois Wesleyan University, 1886, and completed the non-resident course for the degree of Master of Arts. Received the degree of M. A. from Bowdoin in 1891. First Assistant in Gorham Normal School, 1883-91. Professor at M. S. C., 1891 to date. Attended Emerson College of Oratory. Prominent member of various educational societies and President of Maine Pedagogical Society, 1895. *Q. T. V.*

JAMES S. STEVENS, M. S., PH. D.

*Professor of Physics.*

Born in Lima, N. Y., August 21, 1864. Graduated Genesee Wesleyan Seminary, 1881. Graduated University of Rochester, 1885, B. S. Principal of High School, 1885-86. Instructor of Natural Science at Cook Academy, Havana, N. Y., 1886-91. M. S., University of Rochester, 1888. M. S., Syracuse University, 1889. Ph. D., same, 1890. Special work at the Massachusetts Institute of Technology. Connected with M. S. C., August, 1891. *Δ. K. E., Φ. B. K.*

HARRIET CONVERSE FERNALD, M. S.

*Librarian.*

Born at Dover, Me. Entered Maine State College, August, 1881. B. S., Maine State College, 1884; M. S., 1888. Library School at Columbia College, 1887-88. Librarian, M. S. C., December, 1890, to date.

DAVID WILDER COLBY, B. S.

*Instructor in Chemistry.*

Born in Skowhegan, Me., July 2, 1863. Graduated from Skowhegan High School, 1883. Entered Maine State College in 1884. B. S., Maine State College, 1887. Took post-graduate course in Chemistry at Cornell University. Assistant Chemist to Cornell Experiment Station. Assistant Chemist Vermont Experiment Station. Instructor in Chemistry, M. S. C., 1891. *B. Θ. II.*

MARK L. HERSEY, A. M.

*First Lieutenant 12th U. S. Infantry, Professor of Military Science and Tactics.*

Born in Stetson, Penobscot County, Me. Graduate of Maine Central Institute, 1880. A. B., Bates College, 1884. A. M., Bates, 1892. Graduated from United States Military Academy, 1887. Promoted to 2nd Lieutenant 9th U. S. Infantry, Aug. 31, 1887. Reported to President of M. S. C., July 1, 1891. Promoted to 1st Lieutenant 12th U. S. Infantry, 1895.

GILBERT M. GOWELL.

*Professor of Animal Industry.*

Born in Bowdoin, Me., March 14, 1845. Educated in the common schools and Seminary. Taught in public schools ten years. Engaged in orcharding and dairy farming for fifteen years in Maine and Kansas. President of Sagadahoc County Agricultural Society for four years. President of State Board of Agriculture, 1880-81. Farm Superintendent Maine State College, 1882-87. Instructor in Agriculture, 1891-93. Professor of Animal Industry, 1894.

ERNEST PITNEY CHAPIN, M. E.

*Instructor in Electrical Engineering.*

Born in Antrim, N. H., Nov. 1, 1868. Prepared for college at Cushing Academy, Ashburnham, Mass. Entered Cornell University, 1889, in the course of Electrical Engineering. Graduated in 1893, with degree of M. E. With the Wharton R. R. Switch Co., Philadelphia, Penn., 1893-94. Instructor at M. S. C., September, '94.

HARRIS P. GOULD.

*Assistant in Horticulture.*

Born at North Bridgton, Me., Sept. 6, 1871. Graduated from Bridgton Academy in 1889. Maine State College, 1893. Connected with Horticultural Department, M. S. C., since August, 1892. B. G. II.

## Fall Term, 1894.

September	3, Monday,	Before-term examinations begin.
September	4, Tuesday,	Entrance examinations begin.
September	5, Wednesday,	Fall term begins.
October	5, Friday,	Annual military encampment.
October	12, Friday,	
November	27, Tuesday,	Meeting of Board of Trustees.
November	29, Thursday,	Thanksgiving recess.
December	3, Saturday,	
December	7, Friday,	Sophomore prize declamations.
December	18, Tuesday,	Term examinations begin.
December	20, Thursday,	Term ends.

## Spring Term, 1895.

February	4, Monday,	Before-term examinations begin.
February	5, Tuesday,	Entrance examinations begin.
February	6, Wednesday,	Spring term begins.
February	22, Friday,	Washington's Birthday.
April	25, Thursday,	Fast day.
May,		Arbor day.
May	29, Wednesday,	Ivy day.
May	30, Thursday,	Decoration day.
June	1, Saturday,	Senior vacation begins.
June	5, Wednesday,	Field day of agricultural department.
June	15, Saturday,	Junior exhibition.
June	16, Sunday,	Baccalaureate sermon.
June	17, Monday,	Convocation.

June	17, Monday,	Class day.
June	17, Monday,	Commencement oration.
June	18, Tuesday,	Meeting of Board of Trustees.
June	18, Tuesday,	Exhibition drill.
June	18, Tuesday,	Receptions by the fraternities.
June	18, Tuesday,	Reception by the President.
June	19, Wednesday,	Commencement.
June	19, Wednesday,	Commencement dinner.
June	19, Wednesday,	Meeting of the Alumni Association.
June	19, Wednesday,	Commencement concert.
June	20, Thursday,	Entrance examinations begin.

### Fall Term, 1895.

September	2, Monday,	Before-term examinations begin.
September	3, Tuesday,	Entrance examinations begin.
September	4, Wednesday,	Fall term begins.
October	4, Friday,	Annual military encampment.
October	11, Friday,	
November	26, Tuesday,	Meeting of the Board of Trustees.
November	28, Thursday,	Thanksgiving recess.
December	1, Sunday,	
December	6, Friday,	Sophomore prize declamations.
December	17, Tuesday,	Term examinations begin.
December	19, Thursday,	Term ends.

### Spring Term, 1896.

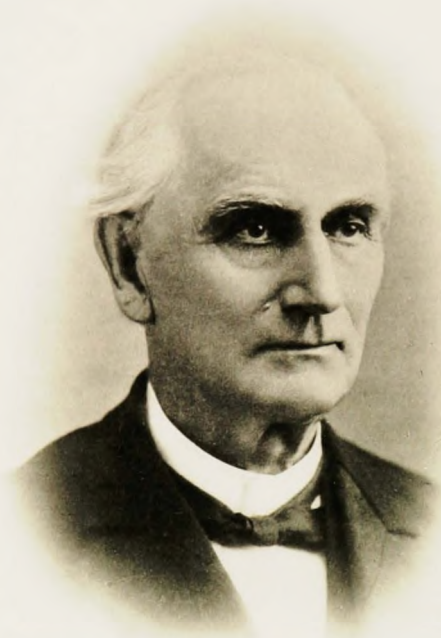

February	3, Monday,	Before-term examinations begin.
February	4, Tuesday,	Entrance examinations begin.
February	5, Wednesday,	Term begins.
June	18, Wednesday,	Commencement.

REPRESENTATIVE O. O. CROSBY, Maine State Grange,	Albion.

## Charles Frederic Allen, D. D.

FIRST PRESIDENT OF THE MAINE STATE COLLEGE.

---

FOR three years after the opening of the Maine State College for students it was without a president.

During the first two years its faculty consisted of a professor of mathematics who was "acting president," and a farm superintendent who was "instructor in agriculture." There were also during these two years three non-resident lecturers for portions of each term—the College year then being divided into three terms. In the third year the faculty was increased by the addition of a professor of chemistry, an instructor in botany and horticulture and an instructor in French and German. The staff of non-resident lecturers had also been increased to six, among whom were Prof. E. S. Morse on zoology; Dr. A. S. Packard, Jr., on entomology, and Mr. X. A. Willard on dairy farming—men all eminent in the lines of their specialties. Throughout these early years in the history of the College the matter of choosing a president was one which had received much attention from the trustees. It had been discussed in meetings of the board, had been left to committees of correspondence, and the more it was considered, apparently greater seemed the matter of choice. It was by no means an easy thing to select the man for the place. The College was new and was to be administered upon wholly new lines in the higher education. There was also much opposition to it—opposition which came from already established colleges, from public men of high influence, from legislators, and from people in nearly all sections of the State—not excepting those in the near locality of its establishment. Under such a condition of public sentiment it can at once be seen that the task of the trustees was most perplexing. As made up in 1871, the year of its choice of first president, the board of trustees consisted of two Congregationalists, one Baptist, one Friend, one Catholic, one Swedenborgian and two whose religious sentiments are not known. That such a board should have selected a Methodist and a clergyman is evidence of their non-sectarian control, and also

evidence that the man of their choice was broader than his denomination, greater than any sect and a representative of the highest material interests and best good of the entire people of the State. The man selected was Rev. Charles Frederic Allen, already an eminent minister of the Methodist church.

Mr. Allen was born in the old historic town of Norridgewock, January 28, 1816. He came of the splendid old New England ancestry noted for its integrity, moral strength and great common sense. His father was William Allen, a native of Martha's Vineyard, who early settled in Maine—first in Industry, subsequently in Norridgewock. He was prominent in town, county and state affairs throughout his long and useful life; was a member of the Constitutional Convention of Maine; was widely known for his high business ability and integrity; published a genealogy of the Allen family, and histories of Industry and Norridgewock; was "father" of the Methodist church in the latter place, and died at the advanced age of 93 years. Of his family was the eminent Dr. William Allen, President of Bowdoin College; while Rev. John Allen, widely known as "Campmeeting John Allen," and during the last years of his life chaplain of the Maine House of Representatives, was his uncle.

Mr. Allen fitted for college in select schools in his own town with one term at Bloomfield Academy, and at the age of 19 entered Bowdoin College, of which Dr. William Allen was then President. At his graduation in 1839, Mr. Allen was one of four in the first rank of scholarship in his class—and at present, beside himself, the only survivor of the class is Hon. John C. Talbot of Machias. During his course at college he taught school in several towns in Maine, and after graduation was appointed instructor in Maine Wesleyan Seminary at Kent's Hill, and for one year was preceptor of St. Albans Academy. In 1843, Mr. Allen entered the ministry of the Methodist church, and between that date and the time of his election as President of the State College, had received appointments to eighteen different charges, including most of the larger and more important churches in the Maine Conference.

It was a complete change in the whole course of his life-chosen profession—that from the work of the ministry to the presidency of a new college, the development and shaping of which, along its untried lines of education, Mr. Allen was to undertake. But it was one for which he was admirably fitted. The instruction of the class room was not new to him, but a task in which he was completely at home. Of some of the branches which came to his chair as President—English Literature and Mental and Moral Science—he was a thorough master—while of those for which no chair had been provided, like Rural Law, he very soon became master. Always a close student of human nature, he knew boys through and

through, and knowing them so well they all loved him and he managed them in the most happy and easy way. His practical common sense, keen business ability and dignified but genial manner were strong elements in his popularity and success, and of all these qualities he had complete and harmonious control in adjusting himself to his new position and shaping the work of the College in its somewhat experimental mission. It was a most difficult work, with limited means and few assistants, to lay the foundation of a college that should afford facilities for a liberal education, especially adapted to those who were to engage in productive industry and business life. Without undervaluing the importance of classical studies for those who were to enter on a professional career, it was deemed necessary to direct the students of the State College to scientific studies and modern literature rather than to Greek and Latin—to do something more than to make successful farmers or skillful artisans—the design of the College was to make educated men, with a broad and generous culture especially fitted for those who were to engage in industrial pursuits.

When President Allen came to Orono he found the College with a total of forty students. He sent out the first class from the institution with their diplomas—that class of six which graduated in 1872. During the eight years of his most successful administration of the College, he sent forth to their life work in the eight classes of its graduates, 119 students, and left the institution with a total of 102 students in its four classes. Among the graduates during his term as President, who have reached high distinction as specialists in different branches of science may be mentioned: Prof. George H. Hamlin, of the State College; Dr. W. H. Jordan, Director of the Maine Experiment Station; Prof. Edward H. Farrington, Chemist to the Illinois Experiment Station; Dr. Geo. P. Merrill, U. S. National Museum, Washington, D. C.; F. E. Kidder, Architect, New York, N. Y., and Dr. F. Lamson-Scribner, U. S. Botanist, Department of Agriculture, Washington, D. C. The faculty of the College was increased between the years 1871 to 1879 from four to eight professors. Among these were three of its own graduates, and of the eight associate professors during the term of President Allen, four are still members of the faculty. Dr. M. C. Fernald, who was a professor under President Allen, has retired after the long service of fourteen years as President of the College; Prof. Charles H. Fernald is now at the Massachusetts Agricultural College, and Prof. Walter Balentine, a graduate of '74, and for thirteen years the able and beloved Professor of Agriculture at the College, deceased in 1894.

During President Allen's term of service he was, *ex-officio*, a member of the State Board of Agriculture. This brought him into close and intimate relations with the people of Maine at the various farmers'

conventions of the Board, held in the different counties, and into vital contact with the farmers and mechanics whose sons and daughters were active or prospective students at the College. By his many public addresses before these assemblies, on subjects connected with general agricultural education, the special education for farmers and mechanics and the aims and methods of study at the State College, President Allen did a noble work in behalf of the institution and in acquainting the people of the State with its grand object—work which is still bearing good fruit and which will not fail of its influence to this end for years to come. Before sessions of the Maine legislative committees, where the wants of the College were from time to time presented, President Allen was always an eloquent, effective and convincing speaker; and legislators believed in the College because they believed in its President. It was also largely through President Allen's counsel and advice that his old friend, ex-Governor Abner Coburn, made the College the munificent bequest of \$100,000. As "master of ceremonies" at commencement dinners, his presiding was most courteous, genial and dignified, and his remarks in introducing speakers were always of the most happy character. It is to be doubted if there was ever a student who came under President Allen's care for any considerable length of time, but can trace in his own life the good influence of the moral training, thorough education and kindly interest given by his beloved President.

In 1872, President Allen received the degree of D. D. both from Bowdoin College and from Wesleyan University, Middletown, Conn.

After having seen the College firmly established upon a broad and sure foundation in its popular career, Dr. Allen felt it his duty to again resume the sacred calling which had been his life work, and which he had for a time laid aside that he might aid in the establishment of this important enterprise for the education of the sons and daughters of the farmers and mechanics of Maine. He accordingly resigned the presidency of the institution at the close of the college year of 1879.

Again, at the age of 63, Dr. Allen re-entered the active service of the ministry with physical powers and mental vigor unimpaired and is still in constant pastoral work. During this latter period of ministerial service he has been for four years presiding elder of Lewiston district; seven years secretary of the Maine Conference; has been twice chosen a delegate to the General Conference; for four years was a member of the book committee of the Methodist Publishing House, and in 1876 was a member of the revision committee of the Church Hymnal—the admirable body of religious hymns in use by the Methodist Church in this country. Here his fine and critical education and love for the grand old hymns of the early days of

the church, prevailed to save many of these hymns to the new collection, when at first a large number of the committee seemed in favor of discarding them for the more "catchy" pieces of recent days. One of the choice divisions of his library consists of well on to one hundred volumes of various editions of Methodist hymns in use from the earliest period of the history of the church in America—an unique and interesting collection. For the long period of forty years Dr. Allen has been a trustee of the Maine Wesleyan Seminary at Kent's Hill; is an overseer of Bowdoin College and a member of the visiting committee of the Maine State College. He is also a member of the Maine Historical Society and has read many papers before that body, several of which have been published in its collections.

At the annual commencement of the State College in 1890, a large portrait in oil of Dr. Allen was presented to the institution by the alumni of the College, with appropriate exercises. An address was delivered by E. F. Danforth, '77, and a poem read by H. M. Estabrooke, '76. On August 25, 1894, occurred the fiftieth anniversary of the marriage of Dr. and Mrs. Allen, which event was celebrated in a most fitting manner in the Methodist church at the West End, Portland, of which Dr. Allen is now pastor. Dr. Allen was married to Miss Ruth S. Morse, August 25, 1844. Their children are: Mrs. Mary Elizabeth Brown, Pasadena, California; Miss Isabel Sibley Allen, Portland; Prof. William Albert Allen, Chief Engineer of the Maine Central Railroad, Portland; Prof. Charles Morse Allen, Pratt Institute, Brooklyn, N. Y.

Dr. Allen can never grow old because his heart is young and he is interested in the good of all young people. Still carrying on the work of the church with much of his old time energy and zeal, he has yet lost none of his solicitude for the noble institution to the foundation of which he gave eight of the best years of his life, and his affection constantly goes out to the men who were once his boys, with an almost filial regard. Interest in all the good and noble things of life, of education, of christianity, knows no lessening as the years advance, while faith in the future constantly grows brighter and the hope of immortality becomes more and more blessed and secure.

# Senior History.

---

ELL, they are Seniors now. At last their steady perseverance has been rewarded and they have reached that eminence toward which they have been so faithfully struggling for three long, weary years. Yes, Seniors, with the full measure of that delusive quality, "Senior dignity."

As one notes the graceful ease with which they "orate" before the student body in chapel, it is hard to realize that these dignified speakers were once awkward and ignorant Freshmen. But nevertheless, it is an incontestable fact, wonderful as it may seem, and the records prove the fact that three years ago last August they made their debut as students of the Maine State College and members of the Coburn Corps. But what a difference between now and then. Then Freshmen and awkward privates, always worrying for fear they would be late to recitations or drills. Now Seniors and commissioned officers, or honored members of the Signal Corps, and ever on the look-out for some reasonable (?) excuse for cutting recitations or drill.

In the "now" and "then" we have the alpha and omega of the record of '95's college career. To make this record complete requires only that one should write of the joys, sorrows, trials and tribulations of the intervening years, and make record of the insurmountable obstacles surmounted, and of the various ways and means by which they achieved progress in the "paths of learning." (Classical allusion.)

In their Freshman year they did not receive the proper amount of care from their worthy predecessors—the Sophomores—so they were somewhat handicapped at the very outset. Realizing the sad effect of this lack of training, they generously resolved that those who succeeded them to the title and position of Freshmen should never feel this same sad lack. So they endeavored, by all the means at their command, to give them a fair start and while the Faculty “taught the young ideas how to shoot,” they supplied the requisite moisture and assisted greatly in the care of the rooms and beds of the Freshmen. They tried to do their duty by all, although often hampered by the larger number of Freshmen. But they did their best and that is all that could be asked.

In the spring term of their Sophomore year, in accordance with the time honored custom, they held their Ivy Day exercises and planted their class ivy with due ceremony. The exercises passed off very pleasantly and creditably, and the only thing to be regretted is that a part of the day's happenings inspired one member of the class to “woo the gentle Muse,” and preserve those records in a poetical effusion widely circulated. (250 copies.) But their “youth and inexperience” accounts for and excuses all.

The Junior year passed pleasantly despite the mighty wrestlings with mechanics and calculus and, although some came out of the encounters rather bruised, all these troubles are now fond (?) memories of the past. During this year quite a number of the class made some experiments, in order to determine the relative values of the 90% and 10% systems of escaping examinations, and after exhaustive trial (especially of the 10% system) it was, I think, almost unanimously decided that the 10% system could be depended upon most surely, to say the least. They took upon themselves also, the thankless task of establishing precedents. They undertook, and carried to a very successful completion, the work of publishing a College Annual, the first of its kind in the history of the institution, and as a further indication of their progressive spirit, the speakers selected to take part in the Junior Exhibition, appeared on the stage in the conventional cap and gown, a rather startling innovation in this quiet place, and perhaps detracted the attention somewhat from the scholarly themes so ably delivered.

In the first term of their Senior year an expedition to Pushaw Lake, for the purpose of making some practical experiments and measurements relating to hydraulics, formed, for the “civil” section of the class, a very pleasant break in the usual college routine. And some practical results were obtained, to judge by the amount of game “said” to have been killed. While in camp there, some of the members of the class, in accordance with their usual progressive spirit, undertook to christen the camp where they were, but the

Professor in charge did not smile on their laudable endeavors, so "Fairy Dale Farm" came out of the woods and returned to its old stand.

Thus the time passes pleasantly, taken up with the varied occupations and pleasures of college life. But the months fly by all too swiftly and the time is fast approaching when they must go forth, armed with a diploma and military certificate, to do battle with the world. Whether these equipments should prove sufficient in all emergencies, time only can tell.

But with the expectation of some day seeing their names carved on the pillars of fame, we bid them "En avant."

## Junior History.

---

It is hard to realize that nearly three years have passed since we made our acquaintance with the Maine State campus and the class of '96 came into existence. It is hard to realize that in a few short months we will be dignified Seniors with the good order of Oak Hall upon our shoulders; with the knowledge that we must tell the Sophomores at least once a week that we will report them if they don't make less noise, and with the responsibility of leading Maine State's little army on to new victories and to worlds unknown.

Of our Freshmen days I need say but little. To speak of some of them would be like probing old wounds, but as a whole they are pleasant memories. Many incidents that at the time brought only mortification and anger, now bring only mirth. On the other hand our Sophomore year, from the time we gathered up our appliances of war and marshalled out the Freshmen to disturb the slumbers of peaceful Orono, until we turned over our battered pails to '97, was one long success.

As Sophomores, as the word is generally construed, we were models. Three of us were examples. Promptly at our bidding the Freshmen took up their agricultural implements and removed all verdancy from the diamond, and as promptly we took up our pails and squirt guns and endeavored to remove all verdancy from them. Early in the fall term we met '97 on the ball field, and, following the time honored

custom, ate the peanuts at their expense. A few weeks later we met them on the gridiron and again damaged our digestive apparatus at their expense. Late in the fall term occurred what has been appropriately called the "Episode of Green's Landing." It would be folly for me to attempt to improve on the wonderfully accurate and blood curdling descriptions which appeared in all the enterprising papers. It is sufficient to say that when the strike was declared off, we, with two well known exceptions, returned to our quarters. Inspections went on with military regularity and the earth revolved on its axis once every twenty-four hours just as it had done before. Then peace reigned. The winter vacation came and went. The first few weeks of the spring term passed as quietly as does the beautiful Stillwater. Some indiscreet Freshmen, deceived by the long period of rest, believed that the Sophs' spirit was broken and placed two apparently insignificant figures over the dining room door. That morning the papers prophesied local showers in the vicinity of Oak Hall and for once, at least, they predicted correctly. For the remainder of the term the Freshmen were trained to carry themselves as all good Freshmen should. The records of the athletic field day are records of ninety-six's athletic victories. These plain figures tell much more eloquently than I can how we won over the combined strength of the other three classes. Among the many recollections of our Sophomore year, none are pleasanter than those of our Ivy Day. Many of our friends, our sisters and cousins, and our room mates' sisters and cousins, assembled in the chapel which was tastefully decorated with the implements of our various callings, to listen to our literary efforts and then to see the planting of the vine that is to perpetuate our memory when we are numbered with the alumni. The day ended and the next one began with the usual banquet in Bangor.

Our Junior year, now so rapidly drawing to a close, has been one of quiet and hard work. On the whole our career has not been an uneventful one. But even our troubles, which have not been few, have only tended to draw us closer together. Our number has decreased a little, it is true, but we cannot expect great men to linger with us always. Nickodemus and Lazarus came down from Bible times and sojourned with us for a season; Sockless Jerry Simpson has left the legislative halls to cast his lot with our band to learn the mysteries of levers and cranks; Shylock is with us, not to carve the flesh of man but the firmer flesh of man's most faithful servant. Even the great George himself has condescended to come down on the farm and learn the art of war.

The influence of '96 is strong in all the varied phases of college life. Its guiding hand is felt in athletics and clubs, in society and fraternity life. I have said nothing about the class room work, but there,

as in athletics, the records tell their own story. Our civils can survey the largest board piles and longest horse sheds ; our mechanics can dissect the most complicated machine ; our chemists can compound the vilest odors known to science, and our farmers—but I am getting too personal.

# Sophomore History.

THE doings of their Freshman year have already been chronicled—how about thirty young sons of America, after bidding adieu to fond parents and to their sweethearts, who, with a parting caress, said with tears in their eyes, "Write soon, Willie,"—and then of subsequent events which came up in the history of these ambitious youths who embarked upon the tempestuous sea of college life for a trip of seventeen weeks. Every one is familiar with the above, but probably only a few know of the contents of those letters which went back to the "plantations" from which these individuals who furnish the subject of this "obituary" came. Perhaps it is just as well if the contents are not divulged, as it is not pleasant for any one to pore over tear-stained epistles which tell of defeats in many directions.

However, they met with cordial receptions from the usual places, namely, the Y. M. C. A. and from the tantalizing Orono young ladies, who, from the steps of Charlie White's post office, cast their captivating smiles upon the innocent Freshmen, which smiles, if they could be translated into "United States," would read, "Won't you be my sweetheart?" At this stage of the game no person should be laughed at if he is homesick and "longs for his home and his mother." Well, they have lived through the temptations that have beset them, and now are almost through their Sophomore year. It is a great pity that there are not more of them, as the small number that they can muster in a scrap is sad to look upon, and consequently has led them to adopt the motto, "Live and let live."

In the performance of their Sophomoric duties they have labored under great difficulties, the Freshmen outnumbering them three to one, in addition to the strength of the faculty which is in such cases usually found to be quite a drawback. In their two years of college life their hair has become long, cigarette boxes have accumulated in their waste baskets, dust has formed on their psalm books and peanut shells have been swept from their rooms, but these were gifts from other classes, for they have never won

any. All these frivolities were the natural results of their former life. Being educated in the rural districts they had never partaken of the gay life which opened before them and so had to live and learn. The greater part of the class of '97 are pursuing the course in Chemistry and they have used their knowledge of compounding in various ways, to which the—blank—Freshmen can truly testify. There is hardly a man in the class who cannot steer the  $H_2S$  through the keyhole of a Freshman's door in a manner which would tend to cause even the Basin Mill pulp mills to blow up in trying to emit gases which could compare with those that are thrown together by the *proteges* of "Johnnie" Aubert.

'97 boasts of the quality of her speakers at the prize exhibition and well she may. They were rightly praised for their excellence in this direction and they will no doubt be heard from in legislative halls in the future. We sincerely hope, however, that they will not hail from Canaan or Canton! Better by far that they confine their oratorical ability to the town meeting than allow such a fate as the above to overtake them.

In organizations of small numbers unity is almost always found and in this class this most important factor is not wanting. They evidently realize that this is one of the elements of success and intend to profit by it. They have two more years at Maine State and it will not be a wrong prediction to say that the members of this class will be prominent competitors for future honors.

## Freshman History.

---

**D**URING the first week of September, '94, there appeared on the campus such an aggregation of verdant youths as never before had been recorded in the annals of Maine State. This was due partly to the modern and popular government recently organized in the College and partly to the increasing popularity with which the people of Maine are coming to regard *their* institution.

In numbers '98 surpasses any of its predecessors and on this account the Sophomores for a long time were busy instilling those fundamental principles of college etiquette—respect for one's seniors—which every Freshman must learn sooner or later. As in every other branch, so here, those who learn the slowest and with the most difficulty remember the longest and make the most practical use of their knowledge. Consequently as Sophomores we expect them to be *par excellence*. There is a doubt whether the Freshmen received all the necessary instruction in this line owing to the Sophomores leaving Oak Hall in order to get more time to study(?)

The military drill, though old to some, was new to a much larger number. They made good progress in this line and seemed to derive special enjoyment from the sand-bag minuet and the setting-up quick-steps, judging from the frequency with which they indulged in these pastimes. In the peanut game they

broke the college record by beating the Sophomores 17 to 10. The exciting part of the game came a few nights after when the peanuts were delivered to the Freshmen. They were left in the manager's room for a few minutes while he summoned his classmates to the feast. In some unaccountable way the peanuts took flight and the Freshmen are wondering to this day whither they flew. Perhaps they will find out after the next peanut game. On the gridiron '98 again proved herself too much for '97, winning the class game by a score of 10 to 0. They also put up some good games against the Foxcroft Academy eleven. Considerable musical talent is also found in '98 and it is hoped that ere long it will assume definite form.

Among its members who have become notorious are "Peanut" Webster, Manager of the '98 B. B. Team; "Haggerty," General Manager of the Greatest Bumming Concern ever seen on the Eastern Promenade, and "Whiskers," who filled a short engagement the past season in "A Midnight Scrape," under the management of '97.

Soon these good little Freshmen will develop into gay Sophomores and only time will tell how much good one year in college has done for them.

Washington, D. C., December 26, 27 and 28, 1894. Delegate, Leroy R. Folsom.

## The Military Department.

---

THE beginning of our present military department is found in one of the conditions which the State of Maine accepted with the land grant for the College. This condition was that instruction in military tactics be furnished the students of the institution. Time has amply shown the wisdom of requiring military instruction in our College. The students graduate with a better physique and are better able to cope with the cares and anxieties of a business life.

In 1868, the first body of students entered M. S. C. and in 1869 a military organization was effected of one company consisting of twenty-two men. They were drilled two hours each Saturday by Capt. H. E. Sellers of Bangor, who thus has the distinction of being the first military instructor at the M. S. C. He was relieved in 1872 by Capt. James Dean, also of Bangor, who gave the same amount of instruction. During this time the students elected their own company officers and were armed with fifty caliber muzzle loading rifles which were furnished by the State.

In 1874, Lieut. W. S. Chaplin was appointed Prof. of Military Tactics, also of Modern Languages and Mechanics. He was the first military instructor who was a member of the faculty. At this time the students numbered 121 and were organized into a battalion of two companies. The drilling consisted of setting up exercises and practice in marching for fifteen minutes daily, before breakfast, and also a weekly drill of one hour. There was no instruction in the Manual of Arms, as the Army Tactics provided for a different arm than that then in use at the College.

In 1875, the cadet officers were appointed by the faculty. This arrangement has been in vogue up to the present time. Early in the spring of 1876, the State furnished the military department one hundred breech loading muskets with the proper equipments, thus making a great addition to the military equip-

ment, and, for purposes of instruction, a great improvement. It was at this time that the uniform of the cadets was changed to the blue yacht cloth without brass buttons and the wearing of it was made compulsory at all drills and other military exercises. This greatly improved the appearance of the battalion at drill. In September, 1876, the name of "Coburn Corps of Cadets" was given to the military organization at the College. This name has been retained ever since. During this year the cadets went to Fryeburg, Me., to attend a meeting of the Board of Agriculture. They remained two days and drilled each day.

Prof. Chaplin resigned his position Jan. 1, 1877, and was succeeded by Prof. Francis L. Hills. A course of Military Science was instituted by Prof. Hills, at the satisfactory completion of which special military diplomas were given. He made many plans for the improvement of the military department, but as he resigned in 1878, he was unable to put them in practice to any great extent. Prof. Hills was succeeded by A. E. Rogers, who is at present a professor at the College. The distinguishing features of his work in this department were the giving of weekly lectures on International Law to the Seniors and also in having weekly recitations in Military Tactics by the Juniors. It is evident that these lectures and recitations were of great aid and benefit to the students. In 1880, the cadets attended the State Fair at Lewiston under charge of Prof. Rogers.

The first artillery company was organized of Seniors in 1881 and was in operation for one year, but owing to the small number of men the battery organization was impossible. Instruction in handling the field pieces, however, continued to be given for about two years.

Prof. Rogers was relieved of his military duties in August, 1882, by Lieut. E. W. Howe, 17th U. S. Infantry, the first officer detailed by the Secretary of War as professor of Military Science and Tactics. The cadet uniform was now changed to cadet gray, blouse, trousers and cap. Target practice at one hundred yards was also required of the Seniors and Juniors. The chief improvement made by Lieut. Howe was the inauguration of the system of inspection of cadet rooms by the military professor. A set of dormitory regulations which were taken largely from the West Point blue book, was also published by him. These were the same regulations, with a few exceptions, as those now in force. In 1883, he had the two field pieces returned to the State Arsenal at Bangor, as the students used them for other purposes than those of instruction. Owing to the decreased number of students the military organization consisted at this time of one company. Lieut. Howe was succeeded in 1885 by Lieut. C. L. Phillips, 4th U. S. Artillery, who restored the battalion organization of two companies and also instituted competitive drills.

One drill of marked interest at this time was the competitive drill with the Nealley Rifles of Lewiston. It was won by the Coburn Cadets, the score being 193 to 192 out of a possible 200 points.

The Cadets had instruction in camp duties in 1886 at Fort Knox on the Penobscot River. These encampments were undoubtedly very instructive, and, with a few exceptions, have been continued up to the present time. Our present rifle range was laid out by Lieut. Phillips. About this time a band of twenty pieces was organized. The uniform was again changed to a cap and blouse of dark blue with State of Maine buttons and a gold braid clover leaf on the cuff. The chevrons and shoulder straps were of red and gold. This uniform has remained in vogue to the present time with exception of the trousers which were gray; they were changed to the present blue in 1888.

Lieut. Phillips was relieved in 1888 by Lieut. E. E. Hatch, 18th U. S. Infantry. Lieut. Hatch first gave lectures to the Seniors on distinctly military subjects. The first inspection of cadets by an officer detailed for this purpose by the War Department took place during the detail of Lieut. Hatch. It occurred on Oct. 22, 1888. This year the cadets went to the Fair Grounds at Bangor for their encampment. In 1890, the band which had been organized by Lieut. Phillips was replaced by a drum corps of three fifes and three drums.

Lieut. Hatch was relieved in 1891 by Lieut. M. L. Hersey, formerly 2nd Lieut. 9th U. S. Infantry; now 1st Lieut. 12th U. S. Infantry. Lieut. Hersey added to the uniform white duck trousers to be worn at dress parade and ceremonies, thus greatly improving the looks of the battalion. In September, 1891, the cadets went to Fort Knox for their encampment which was as usual profitable and instructive in a marked degree. The annual encampments since then have been as follows: 1892, Castine, Me., at old Fort George; 1893, Searsport, Me.; 1894, Portland, Me., on the Eastern Promenade. One week was spent at each encampment. Lieut. Hersey also instituted the system of police inspection of barracks at 7.30 A. M. daily by cadet officers. This system has been of great aid in enforcing the dormitory regulations.

In September, 1892, a signal corps was organized consisting of Senior privates and all others who were excused from drill on the surgeon's certificate of disability. In March, 1893, a band of nineteen pieces was organized and has done excellent work, adding much to the pleasure of life in camp and to the interest in parade and ceremonies. Among other innovations of Prof. Hersey's is the physical training work among the Freshmen. This occupies one-half hour every morning during that part of the year admitting of out-door work. That it has been an excellent thing, measurements taken before and after the work have abundantly shown.

In 1894, owing to the large entering class, the battalion was divided into three companies, thus enabling a larger number of the students to receive instruction in the duties of officers. With the prospect of larger entering classes, of cavalry, artillery and, we hope, a gymnasium and drill hall, the future of our military department seems especially bright.

Lieut. Hersey's detail expires in June, 1895. His successor is not at present known. In Lieut. Hersey the corps has had an instructor who has been untiring in his efforts to bring military and physical education to the notice which it so richly deserves, and his loss will be severely felt in the military department of our College. He has undoubtedly, done more than any other instructor in giving the Coburn Corps of Cadets the high standard of excellence which they now possess.

THE PRISM heartily unites with all in wishes for the future welfare of the military department of our College, and expresses the hope that it will continue to improve in the future, as greatly as it has in the past.

## The Annual Encampment.

---

IT was held in Portland during the week beginning October 5, and ending October 12, 1894. It was quite a distance to take one hundred and seventy-five youths on a week's outing, but the Cadets still live to tell the story of Portland inside out. Never before in the history of the institution had the authorities dared to seriously consider such a proposition as allowing the Cadets to hold their annual encampment in a town of large proportions and the results of the experiment were eagerly watched by every one, especially the Faculty.

The encampment is an event which is looked forward to by the students with a more or less degree of pleasure. Perhaps there are a few who dislike to partake in the arduous duties of military life for a whole week, as it is not all play. Oh no! However, the greater part of the fellows are ready to give themselves up to military discipline for this short time. It is a peculiar coincidence that among the whole Corps of Cadets the two extreme classes, the Seniors and Freshmen, are the most anxious for this annual military fête to take place. Usually for a whole month before the encampment occurs, the Freshies are worked up to the highest pitch of excitement by weird tales of former expeditions related to them by upper-classmen, and therefore they are eager to don their new uniforms and shoulder their rifles. On the other hand the Seniors get a chance to air their dignity and authority to a degree which is not ordinarily acquired. They long for the time when they can command and be obeyed. In camp the commissioned officer is in his glory. He has just received his appointment as Major, Captain, Lieutenant, or perhaps Chief Signal Officer, and his is a position to be envied. For example, there was our 1st Lieutenant and Quartermaster. As he rode up Congress street in a barouche with the aldermen, you might have thought he was mayor

of the city—but he wasn't. It was those whiskers that gave him away. They were beautiful to look upon, but it must have been embarrassing to be taken for somebody. Some people thought that he was our instructor, but the latter's beard had disappeared with the coming of early spring.

The site of the camp was the Eastern Promenade, overlooking the large expanse of water on three sides, whence came soft breezes to fan one's heated brow, caused perhaps by the fatigue of a long drill, or perhaps by the excitement of running guard under the cover of darkness. Many's the time and oft did "Boy" Manter and "Bill Nye" sit in the doorway of their tent and inhale these same gentle breezes after a hot sprint across "No. 4."

The situation of Camp Selden Connor was in some respects an ideal one. The scenery could not be excelled, the surroundings were fair, and the facilities everything. The weather during the week, with slight exceptions, was all that could be desired. How well do all remember the damp, chilly mornings, when the melodious sounds of "Haggerty's" bugle echoed throughout the camp as he played at the familiar call, "I can't get 'em up," with variations. Many of the visitors in camp who were lovers of music, sharply criticised the tone of this young Freshman's bugle calls, but had they known that he had recently swallowed a bale of hay they would have no doubt refrained from these comments.

Speaking of music, brings to mind the gilt-edged aggregation that occupied the lower row of tents facing the avenue, who discoursed sweet music on all occasions. This was the first team of the kind that Maine State had ever put into the field, and although no regular contests of endurance were arranged with the other colleges, without doubt our own delegation, with proper gymnasium facilities, could head the list. On the whole, the band did exceedingly well and although "de Molay" was the worst sufferer of all their selections, there is consolation in knowing that a small repertoire well played, is preferable to a larger one indifferently executed.

Then there was the Signal Corps, which is composed of members of the battalion who are in any way indisposed. Their work during camp was by no means easy, as is shown by the number who deserted to the companies.

One new feature of the encampment and one which everyone hopes will be omitted hereafter, was the "long roll." For the benefit of those who are not familiar with this formation, it might be well to say that it is made in the dead of night when all should be sleeping. A prolonged roll of the drums is the signal for everyone to take their places and respond to their names when called, and be ready to suppress

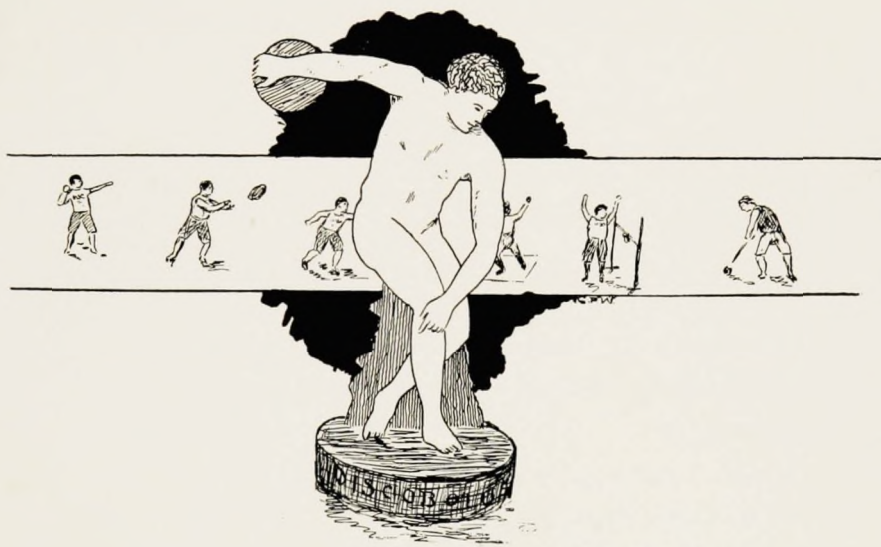

an attack. In this case, however, it was characterized simply by general gnashing of teeth and tearing of chevrons. Much practical knowledge can be obtained on these annual trips. Each year there is an abundance of implements taken along with which to dig intrenchments and throw up breastworks, but until this year nothing of much importance has been done in this line. As an illustration of what the Cadets could do in an emergency, one poor Freshman was set at work making excavations!

The drilling of the battalion was of a high order, and we were highly complimented in that direction. One of our Seniors, however, was a victim of "Upton Tactics," but he received no reprimand other than his own punishment.

On the way back to Orono, a few very pleasant hours were spent at Waterville, where we sat down to a *bounteous* repast and looked over the buildings of Colby University. It was intended that a battalion drill should take place on the campus, but you can imagine our great disappointment in only half completing the movements owing to the departure of our train!

## Base Ball Expectations.

---

BASE ball at Maine State has been a long series of ups and downs—mostly downs. In this sport the need of a suitable gymnasium has been felt very forcibly. Even if we had the tread-mill so kindly suggested by one of the Augusta Solons, it would not be so bad, but when the beautiful snow comes down from heaven and covers the potato field with a spotless robe, and the rocks in the back pasture are buried too deep to be moved, then the base ball enthusiasm wanes and the muscles of the athlete become flabby from want of exercise. But in spite of all these drawbacks, base ball has lived and prospered, although at times it has been in a very deep sleep. The season of '93 was only a partial awakening from one of these slumbers. The season of '94 was better and at times brought back to us the balmy days of Small and Rogers when we won the pennant. As it was, we can comfort ourselves with the thought that we would have won if certain things had only been different.

If we had only had money enough to give the team a rest between league games; if we had only had a second pitcher as good as the first; if we could have only stopped when we led the league. But let us stop thinking what might have been and consider what will be. The season of '95 opens with the loss of only a few players and the entrance of a number of good ones; with a good coach and a new field; with a good management and a strong financial backing. The team will be composed of men who are old in the game and consequently have lost the nervousness of new men. The candidates are numerous and each man will have to work for his position. The players are so divided among the classes that only two or three will graduate each year. On the whole the prospects of base ball at Maine State were never brighter; so then let us work and hope for another pennant to hang in the new gymnasium that is sure to come in the near future.

## Foot Ball Explanation.

---

THE Maine State foot ball enthusiasts have had many drawbacks with which to contend. When foot ball was started in the fall of 1892, no one had more than an imperfect knowledge of the game. Foot ball is a game of science. Muscle and beef are not, as many suppose, the only requirements. A foot ball player must be agile and strong, but above all must have a cool head and sound judgment. If weight can be added to these, so much the better. We have had in the past plenty of raw material but the skilled labor has been wanting. In the last few years foot ball has advanced in a marked degree in the high schools of the State and consequently the entering classes have contained many skilled players. In the last season very little was done in foot ball. Nevertheless the work of the practice eleven and the '97 and '98 teams showed that we have sufficient material and material of the proper sort to place foot ball firmly on its feet at Maine State. The remarkable line work of the Freshmen in their games with heavier teams leaves no question as to the strength of the varsity line of 1895. In the coming season every effort will be made to make foot ball a success. We have already some very good backs and more are expected in the class of '99. The new athletic field will provide one of the best grounds in the State and the new electric road will bring the spectators to its very gates.

So then let every one, faculty and students, athletes and pluggers, get into the blocking and prepare for a long and successful run.

# Track and Field Athletics.

---

UNTIL the past year, track and field athletics were practically unknown at Maine State. Only a slight ripple of the strong current reached us from our sister colleges. It cannot be said that this was due to lack of material, when we consider the records made by some of our men, who, for various reasons, have gone to other institutions where the facilities for athletic training are superior to ours. We cannot truthfully say that we have no gymnasium, for we are the proud owners of a set of parallel bars, as many as three pairs of Indian clubs and a roof large enough to cover them all at once. With the aid of this extensive apparatus, the athletic association decided to hold a field meet in the spring of 1894. The records show, to some extent, how much of a success it was. There are, however, many successful things about it which the records do not show. They do not show the interest which this first meet awakened in track and field athletics at M. S. C. They do not show the difficulties under which the committee labored in carrying out an idea wholly new. Among the many things which they do bring forward, is the painful lack of proper coaching and training and the overwork of a few. Both of these evils will probably be eliminated by the advent of many new students, fresh from good high school training and with their pockets full of the necessary cash which is, at present, most conspicuous by its absence.

At the present time, the prospects for the meet of 1895 are very promising. Arrangements are being made to secure a good coach and also for an intercollegiate meet. We should not be discouraged because our conditions are unfavorable, but rather work the harder that our record at this meet may be a standard for future classes.

HEYWOOD, '96.

## Tennis Prospects.

---

It may be truthfully said that Maine State has had better success in tennis than in any other sport which she has entered. The Intercollegiate Tennis Association, consisting of Bowdoin, Bates, Colby and Maine State, was formed in 1892 and we have been well represented in the tournaments held each year by this association. While we have never won any prizes until last season, we have been no mean opponents, and our past record is one of which we should not be ashamed.

The courts on the campus are in fair condition and we expect that when the new athletic field is completed they will be placed all together. We naturally feel very much interested in the cup for second place in singles, as it was offered by Mr. Southard, an alumnus. It has been in our possession during the past year and we hope that it will remain here.

In former years our representatives have lacked sadly in practice, occasioned partly by the want of good opponents with whom to practice, and partly owing to the almost certainty they had of no one beating them. These difficulties will be overcome, however, by the advent of more tennis material, which will surely show itself in classes of so large numbers, and will consequently tend to make the old players hustle to keep their places in the tournament.

*Honorable Mention*—H. A. WHITE, H. E. STEVENS.

# GRINDS.

---

*"If the coat fits you, put it on."*

## FACULTYISMS.

"Wall !"

"As a rule,"

"Oh my, no !"

"I suspect so."

"Wrong supposition."

"We'll assume . . . . ."

"Grant White says . . . . ."

"I'll question you."

"Your author states . . . . ."

"I take it that's plain."

"Er—er that's very well, Mr.—."

"We'll come to that presently."

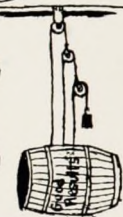

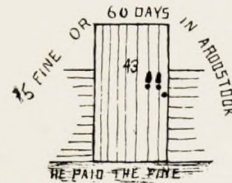

## MATHEMATICAL TERMS.

Maxima and Minima—Our Professor of Chemistry and his assistant.

Units of work—Watts.

A natural log—Despeaux.

Finding shearing force—Barber at work on Martin '96's hair.

EVIDENTLY  
A  
PLUS QUANTITY

“ Wall, be gosh, we haint heard nothin’ about that ere course in Agriculture up there to Orono until this winter, when they put in a bill to appropriate \$5,000 to start a course in *pharmacy!*”

“ Naow this state can’t afford to support two medical schools. Why, here’s the State College with a bill to appropriate a big sum of money for *physics!*”

The rag that Senator Hume chewed last winter.

CHEMICAL TERMS.

Insoluble carbonates—Boarding house biscuit.

Adhesion—The property that brings our co-eds.

Brass alloy—Smith and Decelle.

Ethyl Benzole—A dangerous compound.

Fat Extraction—Wiswell '98.

Atomic Weight—Prof. Aubert.

POPULAR FALLACIES.

That Higgins stole the money.

That “Janie” Gould is Prof. of Mechanical Engineering.

That York, '98, owns Coburn Hall.

That all who wear their society pins on their sweaters are Freshmen.

That the Orono Board of Health is noted for its alacrity.

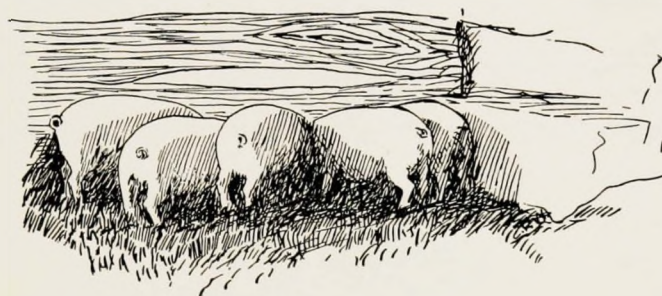

That de Haseth is excused from drill because he is an alien.

That Fernald is foolish.

That Randlette don’t go down town.

That Clary's sideboards were ornamental.  
That Nowlan was properly shaved.  
That scientific cooking is a success.  
That Searsport men are stayers.  
That Brown, '97, owns the reading room.  
That the Faculty attends chapel when "Prex" is away.  
That there are no Congressional Reports in the library.  
That Prof. Jordan found "Honey."

A glimpse of the boarding house.

Plug, plug, plug,  
Till his eyes are heavy as lead,  
Till the midnight shadows 'round him steal  
And he longs to creep to his bed.

But alas! for the Junior Civil,  
His Mechanics he never can learn,  
And alas! for the examination,  
When his seventy per cent. he must earn.

How to do it he doesn't know now,  
But he'll make a terrible try,  
And if he should get an arrearage  
It will be because "hosses" are shy.

Then plug, plug, plug,  
Till the covers break and bend,  
But Lanza's Applied Mechanics  
He never will comprehend.

Co-eds.—The kind of *men* Maine State don't want.

A long necker—Libby '96.

Chapel Voluntary—Seem's though we have heard it before.

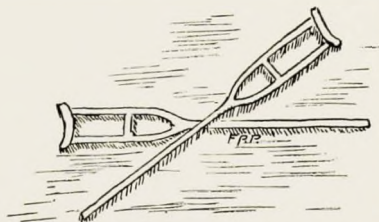

"We will begin the meeting by the use of No. 49"—What Tolman said when he led the Y. M. C. A. meeting.

Jeffery's pumps have surely come.

Marston,	}	We will never do it again.
Rogers,		
Whitcomb,		
Manter,		

Fifty-candle power—Reddy's bruder.

'96 REMINISCENCES.

"Absence makes the heart grow fonder."

OUR APPROPRIATION.

Before      and      After.

\$ - - - - - \$

When our Seniors doff their caps and gowns  
And return again to their native towns,  
Maine State will lose one valuable man,  
But "There are others."

In his four years upon the farm,  
The power of his mighty arm  
Has been made known to men galore,  
But "There are others."

As a kicker he was at his best,  
And whatever position he wished to wrest,  
In his struggle on he seemed to forget  
That "There were others."

But soon he'll be out in the cold, cold world,  
Where the others are found in the dizzy whirl,  
For the coveted position of running this earth;  
"Poor Blossom."

MILITARY TERMS.

Left oblique—Jerry and his cornet.

Cause of unsteadiness—"Nimrod."

Go "right by files"—The girls when they meet "Hamlet."

A flank attack—Oakes and the bear.

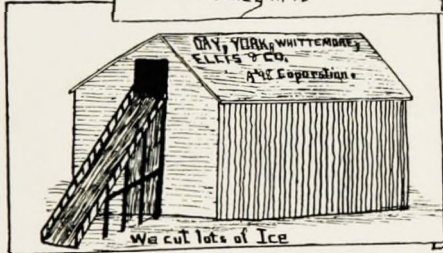

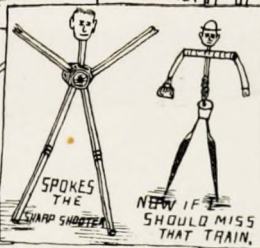

Why not at Maine State?

TRY THIS OVER ON YOUR PIANO.

Grover! Grover!  
We've had four years of Grover,  
He has Mechanics and Graphic Statics,  
And we're never in the clover.

Grover! Grover!  
In these four years of Grover,  
If we'd had our lessons  
In tensions and compressions,  
We might have been in the clover.

## Quotations.

CALDERWOOD—"He is well paid that is well satisfied."

EX-CADET EDITORS— "Nothing now is left  
But a majestic memory.

DAMON—"The strongest passion which I have is honor."

ROBINSON, '95—"Those who in quarrels interpose,  
Must often wipe a bloody nose."

MOULTON—"Graced with a sword but worthier of a fan."

DE HASETH—"The ladies call him sweet."

ELLIS, '95—"God's love seemed lost upon him."

MURPHY—"Great is the dignity of authorship."

After Damon got at it.

### A FARRAR PROPOSITION.

"Give me a kiss," he prayed ;  
"I won't," replied the maid ;  
"But, well," she said, "suppose instead  
We simply trade?"

KIDDER—"There is a pleasure in poetic pains,  
Which only poets know."

DUNN—" And her golden hair was hanging down her back."

VEAZIE—" The loveliest city on the plain."

STEWART—" A wise son maketh a glad father."

STEVENS, '97—" None so homely but loves a looking-glass."

BOARDMAN—" The kid yet lies in smiling childhood."

BROWN, '97—" A truly rustic individual."

BIRD—" The empty vessel makes the greatest sound."

RING—" She's no chicken."

HOPKINS, K. C.—" They say a carpenter is known by his chips."

BRYANT, '98—" Too much of a good thing."

MARSTON—" I am His Highness' dog at Kew !  
Pray tell me, sir, whose dog are you ? "

MERRILL, '95—" Tho' modest, on his unembarrass'd brow  
Nature had written—Gentleman."

CALCULUS—" Rocks whereon greatest men have ofttest wreck'd."

## Acknowledgements.

---

The biographical sketch of Dr. Allen was written by Hon. S. L. Boardman of Augusta.

The encampment pictures were taken by Mr. D. W. Colby.

The printing was done by the firm of C. H. Glass & Co. of Bangor, Maine, and to them we owe the origination of many ideas.

The heliotypes were made by The Heliotype Printing Co., Boston.

To the above we express our most sincere thanks.

Prominent among those who have lent us assistance in the work are the editors of the first volume. The experience which they gained has been a source of great help to us, as well the excellent advice which they willingly gave.

The members of the class have loyally sustained us in the undertaking, and especial credit is due to Mr. F. L. Marston for his history of "The Military Department" and to Mr. F. P. Pride for his drawings.

Lastly, our advertisers. Fortunately they are many, for the financial success of the book is almost entirely dependent upon their support. We hope that their investments will not prove unprofitable, and if the importance of patronizing those who patronize us could be forcibly impressed upon the minds of the students the success of all our future College publications would be assured.

THE EDITORS.

# ANOTHER DECISION

— IN FAVOR OF —

## HILDRETH'S VELVET MOLASSES CANDY

ALL OTHERS ARE IMITATIONS.

In the supreme court in the test case of HILDRETH against the D. S. McDonald Candy Co., of Boston. The Supreme Court of Massachusetts says : In the case of HILDRETH against the D. S. McDonald Company of Boston for selling molasses candy in a package similar to that of the "VELVET", but with the word "McDonald" printed thereon in red ink, Judge Morton grants an injunction to restrain the defendant, and in giving his decision says : I think that the printing of the word in red materially increases the resemblance (between the packages of plaintiff and defendant). It seems to me that the defendant cannot justify printing the word in red across the middle of a wrapper, whether it is his own name or some other name or word, which taken in connection with the size and shape of the piece of candy, style of wrapper and kind of wrapper, causes the defendant's candy to resemble the plaintiff's and render it liable to deceive the public : and it is that liability on the part of the public to be deceived into buying the defendant's goods for the goods of the plaintiff, which the plaintiff has a right to be protected against, whether the word printed in red is the defendant's name or some other name or word. I think that the printing in red upon the middle and ends of a yellow waxed manila paper was original with the plaintiff.

"I think that the plaintiff is entitled to an injunction restraining the defendant from printing in red upon yellow wrappers used in putting up molasses candy in the size, shape and manner in which the plaintiff's molasses candy is put up, his own name or any other name or word so as thereby to cause the defendant's candy to resemble in its dress and appearance the candy of the plaintiff."

The above was made a test case as to the right of HILDRETH to the exclusive use of his wrapper, package and printing thereon, and was decided after a full trial conducted by eminent counsel on both sides. It is the third decision in said court for Mr. Hildreth, protecting his trade mark and the dress of his goods on the market. Mr. Hildreth pursues all infringers, not only to protect his rights, but also to protect his customers and the retail dealers from unfair competition with inferior goods at a lower price, and to protect the public at large from buying under false pretenses, goods offered as and for his, or, as the same as his, and thereby depriving purchasers from enjoying his pure, delicious and unequalled "VELVET" MOLASSES CANDY.

## Great Clearance Sale

. . . OF . . .

**CLOTHING** and Gentlemen's  
Furnishing Goods

At **OAK & CLARK'S,**

**45 West Market Square,  
Bangor, Maine.**

The "Clearance Sale" at Oak & Clark's  
Was drawing all the town,  
And when their rivals saw the crowd,  
They started in to frown.

But frowns accomplished nothing much,  
The crowds still came along,  
For at the store of Oak & Clark  
They got goods for a song.

They bought the finest suits of clothes  
For less than half the cost,  
They bought nice hats to match the coats,  
To buy no chance they lost.

Then all the town thanked Oak & Clark,  
For what their store had done,  
And through their wise sagacity  
They kept the trade they won.

# An Introduction to Ethics.

BY

**Prof. J. Clark Murray, LL.D.,**

Professor of Mental and Moral Philosophy. McGill  
College, Montreal.

*Author of "Handbook of Psychology."*

12 MO. \$1.50.

"This Introduction or Handbook of Ethics traverses with singular clearness the entire groundwork of man's moral nature and his obligations and duties. The whole book is instructive, and the student will derive much guidance from its perusal."—*North British Economist*, Edinburgh.

"In this inadequate notice of Dr. Murray's 'Introduction to Ethics,' we can give but a faint impression of the wealth of learning, the depth of thought, the lofty purpose, the clearness of language, and the absence of pretension, which characterize the work."—*Montreal Gazette*.

# Handbook of Psychology.

BY

**Prof. J. Clark Murray, LL.D.**

Now in use at Harvard, Columbia, Cornell and other  
prominent American Colleges.

12mo. Fourth Edition, Enlarged and Improved, \$1.75

Clearly and simply written, with illustrations so well chosen that the duller student can scarcely fail to take an interest in the subject.

"Professor Murray's good fortune in bringing to light the 'Maimon Memoirs,' together with the increasing popularity of his 'Handbook of Psychology,' has attracted the attention of the intellectual world, giving him a position with the leaders of thought of the present age. His writings are at once original and suggestive."

# THE MAINE STATE COLLEGE

Orono, Maine.

## A School of Science and Technology.

**The Courses of Study Leading to Degrees** are eight, each requiring four years for completion.

The Scientific Course is the basis course, from which the technical courses diverge. It is designed for those who seek the College for general culture and training. It differs from the usual college course by omitting Latin and Greek, and substituting French, German, English and scientific studies.

The Agricultural Course is designed for those who wish to become farmers, teachers or investigators in agricultural science, or editors of agricultural papers. In this course, agriculture is treated as a branch of technology. For those who wish practical rather than scientific training in agriculture, shorter courses are provided.

The Civil Engineering Course is designed for those who wish to become surveyors, railroad, highway, hydraulic, bridge, or sanitary, engineers.

The Mechanical Engineering Course is designed for those who wish to become managers of manufacturing plants, or general mechanical engineers.

The Electrical Engineering Course is designed for those who wish to fit themselves for any line of practical work in electricity.

The Chemical Course is designed for those who wish to become professional analysts, teachers of chemistry, or managers of industries in which an extensive knowledge of chemistry is needed.

The Pharmacy Course is designed for those who wish to prepare themselves for the practice of pharmacy, and at the same time obtain a broad general training.

The Preparatory Medical Course is designed for those who propose to take up the study of medicine after graduation and wish to so shape their college work as to furnish the best preparation.

**The Short Courses** are as follows:

The Pharmacy Course, of two years, is designed for those who wish to obtain a practical training in pharmacy in the shortest time.

The Electrical Engineering Course, of two years, is designed for those who have time for only the practical training in electricity.

The Course in Library Economy, of one year, is designed for those who wish instruction in the care and management of libraries.

The Agricultural Courses, of one and two years, are designed for farmers.

The Training Courses, of six weeks each, in General Agriculture, in Dairying, and in Horticulture, are planned for farmers.

The Farm Course is a series of lectures, on agricultural topics, not less than five in number, to be delivered at any place in the State where a class may be organized under an agreement to attend regularly and pay the expenses.

The College Year is divided into two sessions beginning on the first Wednesday in February and September.

Rooms and Tuition are free.
